# NETOP®
Vision™ Mobile
Mobile Classroom Management

Netop Vision Mobile is the app for teachers that puts the full power of your desktop computer onto your iPad. Now you can move freely around the classroom while accessing all of the educational resources on your PC from your iOS device. When used with Netop classroom management software, Vision Mobile extends the full functionality of the Vision software to the teacher's iPad, enabling teachers to guide student learning remotely.

"I can easily move around the room and help students without having to go back to the front of my classroom to complete the task."

JEFF BUCHANAN - ANDALE HIGH SCHOOL

Untie yourself from your desk

Vision Mobile lets you access and control anything on your PC from your iPad, from anywhere in your classroom or school.

Spend less time waiting

With real-time screen transfer, Vision Mobile is lightning-fast. Commands and screen changes take effect instantaneously, because class time is too valuable to waste.

No Internet needed

Vision Mobile connects via Wi-Fi on your school's LAN. Access your PC from your iPad from anywhere in your school.

Smooth daily startup

After you've connected to your desktop once, Vision Mobile saves your computer in your favorites list, making your daily startup painless.

Your data is safe

With Vision Mobile, access to your computer from your iPad is password-protected, preventing any unauthorized access.

The controls make sense

Drag and drop. Tap, swipe, pinch open, pinch close – all the iOS gestures you already know. Plus full keyboard and mouse – it's intuitive and complete.

Full functionality

When combined with Vision or Vision Pro, Vision Mobile offers full classroom management functionality – not a stripped-down version – with the same familiar dashboard.

What can you do with it?

Run a presentation from anywhere in the room. Maintain presence among your students, without losing access to your desktop. When class meets in the library and you need a file, you don't have to run back to your room to get it: you can pull it up on your iPad. Better yet, when combined with Vision or Vision Pro, Vision Mobile is the iPad classroom management solution that lets you actively manage and monitor each of your students' computers, whether you're at their side, at your desk or walking the room.

Control Your Classroom from an iPad

Easily view classroom computers with a single touch.

Includes the same dashboard used on other Vision products.

TWO COMPONENTS ARE REQUIRED FOR VISION MOBILE

Vision Mobile App for your iPad

Runs on:
- Apple iPad with iOS 5.0 or later
- Wireless connection to school LAN
  Note: the app cannot connect over the Internet

Vision Mobile Connector for your PC

Runs on:
- Personal computer with Windows XP, Windows Vista or Windows 7 operating system; 32 and 64-bit versions supported
- Wired or wireless network connection to school LAN

Vision Mobile can also be used with Netop classroom management software to manage and monitor student computers from your iPad. Vision Mobile is included with Vision Pro classroom management software, and also works with Vision and MyVision classroom management software.

The Vision Mobile Connector cannot co-exist with a Netop Remote Control Host, including the Host which is part of "Netop Remote Control for Education" solution. Only one Host/Connector can be installed and executed on a computer.
