# Vision helps educators *keep students safe*

Now that school districts offer remote or hybrid learning for their students, there are new security concerns to be addressed. Vision Student Safety helps districts address those concerns.

## **CIPA Compliant**

Worry-free protection against offensive content online

## **Cloud-Based**

Up-front costs for hardware, and more flexibility and scalability.

## **Remote Protection**

Your distance or remote learning programs are safe and secure.

## **Browsing Activity**

Available early 2021. See websites visited during class sessions.

## **Simple to Set Up**

Any Google admin can set up Student Safety within minutes.

## **Contextual Analysis**

Available early 2021. AI powered, real-time protection.

## **Cost Effective**

A content filter that is simple and saves money.

“It is wise to prevent students from accessing inappropriate content in all settings.”

—COSN, Smart Education Networks by Design (SEND) Initiative
